Updating Scientific Workshops and European Cooperative Projects

The European Angiology Days are Academic meetings organised yearly :

1. Aims

- to offer high level updating on one topic integrating clinical and research aspects.
 - to divulge information and receive contributions on the progress of the European educational and research projects proposed by VAS.
 - to debate with colleagues from other specialties on a theme with a multidiscipline approach to arrive at the layout of guidelines.
2. The workshops will focus on a different topic each year, both with lessons and identifying the main issues for contributions and discussions.
3. The topics are selected by the European Angiology Days Scientific Committee from the proposals received. These **proposals should arrive at the VAS Head Office by February each year**
4. Each year during the EAD's a meeting with the *patients and population* is organised "Questions for the Experts". Here European specialists answer the patients' questions (simultaneous translation), as part of the education/awareness project.
5. Each year a session will be dedicated to a "Multidiscipline Joint Session" with one or more Scientific Societies/Associations on a topic of common interest to arrive at a stable agreement for collaboration.
